

A 3D visualization of a city environment, likely generated from a point cloud or similar data. The scene shows various buildings and structures in shades of gray. A small red drone is positioned in the center of the image. A yellow and orange object, possibly a fire or a specific point of interest, is located on a rooftop. A green circle highlights this object, and a green line connects it to a label. A person, representing the pilot, is shown in the bottom left corner, looking towards the drone. A label points to the person.
